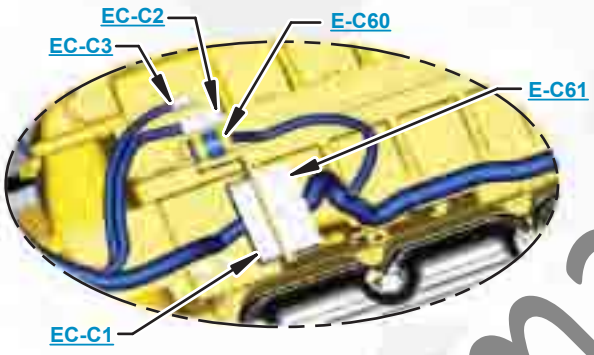
The Bookmarks panel will allow you to quickly navigate to points of interest.

This document is best viewed at a screen resolution of 1024 X 768.

To set your screen resolution do the following:
RIGHT CLICK on the **DESKTOP**.
Select **PROPERTIES**.
CLICK the **SETTINGS TAB**.
MOVE THE SLIDER under **SCREEN RESOLUTION** until it shows **1024 X 768**.
CLICK OK to apply the resolution.



Click on any text that is BLUE and underlined. These are hyperlinks that can be used to navigate the schematic and machine views.

VIEW ALL CALLOUTS

When only one callout is showing on a machine view this button will make all of the callouts visible. This button is located in the top right corner of every machine view page.

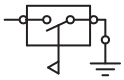
Symbols and Definitions

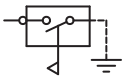
Fuse: A component in an electrical circuit that will open the circuit if too much current flows through it.

Switch (Normally Open): A switch that will close at a specified point (temp, press, etc.). The circle indicates that the component has screw terminals and a wire can be disconnected from it.

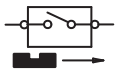
Switch (Normally Closed): A switch that will open at a specified point (temp, press, etc.). No circle indicates that the wire cannot be disconnected from the component.



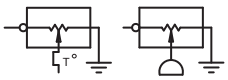
Ground (Wired): This indicates that the component is connected to a grounded wire. The grounded wire is fastened to the machine.



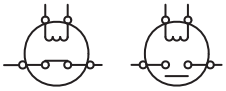
Ground (Case): This indicates that the component does not have a wire connected to ground. It is grounded by being fastened to the machine.



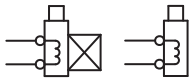
Reed Switch: A switch whose contacts are controlled by a magnet. A magnet closes the contacts of a normally open reed switch; it opens the contacts of a normally closed reed switch.



Sender: A component that is used with a temperature or pressure gauge. The sender measures the temperature or pressure. Its resistance changes to give an indication to the gauge of the temperature or pressure.



Relay (Magnetic Switch): A relay is an electrical component that is activated by electricity. It has a coil that makes an electromagnet when current flows through it. The electromagnet can open or close the switch part of the relay.

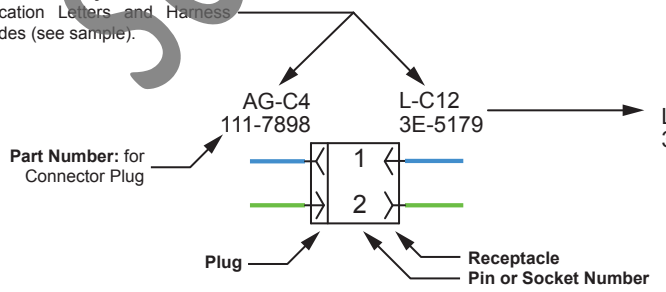


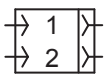
Solenoid: A solenoid is an electrical component that is activated by electricity. It has a coil that makes an electromagnet when current flows through it. The electromagnet can open or close a valve or move a piece of metal that can do work.

Magnetic Latch Solenoid: A magnetic latch solenoid is an electrical component that is activated by electricity and held latched by a permanent magnet. It has two coils (latch and unlatch) that make electromagnet when current flows through them. It also has an internal switch that places the latch coil circuit open at the time the coil latches.

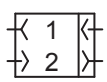
Harness and Wire Symbols

Wire, Cable, or Harness Assembly Identification: Includes Harness Identification Letters and Harness Connector Serialization Codes (see sample).





Deutsch connector: Typical representation of a Deutsch connector. The plug contains all sockets and the receptacle contains all pins.



Sure-Seal connector: Typical representation of a Sure-Seal connector. The plug and receptacle contain both pins and sockets.

NOTE A: THERE ARE TWO VERSIONS OF DASH HARNESS FOR THIS MODEL: HARNESS E AND HARNESS EW. HARNESS E IS THE STANDARD DASH HARNESS. HARNESS EW HAS THE STANDARD WIRING IN ADDITION TO CIRCUITRY NEEDED TO SUPPORT EITHER OF THE TWO ACCUGRADE DISPLAY HARNESSES: HARNESS AG OR HARNESS CT. THIS ADDITIONAL CIRCUITRY IS ROUTED THROUGH CONNECTORS EW-C14 AND EW-C15.

NOTE C: CONNECTORS RP-C25 AND RP-C26 MUST BE CONNECTED TO EACH OTHER WHEN THERE IS NO PM400 LASER ACCUGRADE POWER REGULATOR ATTACHED. IF A PM400 ATTACHMENT IS USED, CONNECTORS RP-C25 AND RP-C26 MUST EACH BE CONNECTED TO THE APPROPRIATE CONNECTOR ON THE PM400 JUMPER.

NOTE D: THIS IS A SUPPLIER PROVIDED ATTATCHMENT JUMPER. IT HAS NO CATERPLLAR INC. PART NUMBER.

NOTE F: 12V RADIO (DEALER INSTALLED)

NOTE H: CONNECTOR ASSEMBLED TO THE HARNESS DURING CAB ASSEMBLY AS PART OF WASHER GP - WINDSHIELD

THIS SCHEMATIC IS FOR THE D6T TRACK-TYPE TRACTOR ELECTRICAL SYSTEM

Components are shown installed on a fully operable machine with the key and engine off, transmission shifter in neutral and with parking brake set.

Refer to the appropriate Service Manual for Troubleshooting, Specifications and Systems Operations.
Refer to the Parts Manual using a specific serial number prefix in SIS before ordering parts from this schematic.
